

Interested in improving the availability, quality and efficiency of local transportation services for older adults, people with disabilities and/or individuals with lower incomes?

We can help.

Improving access to transportation for all community residents starts with a coordination plan. Coordination strategies as simple as information sharing, reciprocal customer referrals, shared maintenance or joint training programs can improve performance and lead to significant reductions in operating costs for transportation providers. For many providers, increased coordination can enable them to serve more customers and/or offer a higher level of service at the same level of expenditure.

Under the auspices of the Central Yavapai Metropolitan Planning Organization (CYMPO), a Local Coordinating Council has been organized to develop and implement transportation coordination strategies within the greater Prescott region. The ultimate goal of this program is to expand local transportation options and thereby increase the number of people served, and the number of rides provided.

The various coordination strategies being implemented locally are outlined in CYMPO's Yavapai County Regional Mobility Management Implementation Plan. Territorial Transit and Central Yavapai Transit Foundation are two of many local partners working with CYMPO and the Local Coordinating Council to expand mobility options for area residents. We invite local transportation providers and other stakeholders to join the effort and assist in selecting those coordination strategies which are most appropriate for our region. For information on the Local Coordinating Council, or the Mobility Management Implementation Plan, please contact the Mobility Manager at CYMPO at (928) 442-5734. For more information on local transportation options, please contact Territorial Transit or Central Yavapai Transit Foundation at (928) 776-9332 or e-mail us at territorialtransit@gmail.com or CentralYavapaiTransitFound@gmail.com.
